

In the Abstract:

ABSTRACT OF THE DISCLOSURE

~~A SYSTEM AND METHOD FOR USE ON A TERMINAL TO MANAGE AN  
ARCHITECTURE DEDICATED TO A COMMUNICATIONS NETWORK~~

System for managing at least one architecture (15, 16, 17, 18) of a terminal (10) dedicated to a communications network (40, 41, 42, 50, 51, 52) ,said The terminal (10) ~~including~~ includes at least one user interface (11). ~~According to the invention, connections~~ Connections to said the communications networks network (40, 41, 42, 50, 51, 52) being are set up via a mobile network[[,said]] The system comprises at least one dedicated architecture manager (24) integrated into said the terminal (10), adapted to manage at least one architecture (15, 16, 17, 18) dedicated to a communications network (40, 41, 42, 50, 51, 52), and adapted to process simultaneously the operation of said the communications networks (40, 41, 42, 50, 51, 52). ~~Application to the~~ This technique enables simultaneous management of access to a plurality of communications networks offering a set of services from a terminal connected to a public mobile network to which the user is a subscriber.
